- Universidad Politecnica de Madrid, ETSIT
  - Deliverables Report
    - Table of contents
  - Introduction to ROS2
  - Basics of ROS2
    - B.1 Publisher and Subscriber
  - Deliverables
    - D.1 Adding the STM hardware to the ROS2 environment
    - D.2 Implement the STM ROS2 Control Node
    - D.3 Create Launch files
    - D.4 Visualizing the STM in RVIZ2
    - D.5 Integrating the STM serial node to control the Turtlesimin Gazebo

# Universidad Politecnica de Madrid, ETSIT

# Deliverables Report

Daniel Hojný (daniel.hojny@fs.cvut.cz)
CTU Prague, Faculty of Mechanical Engineering

Athens, Session March 2026
Course UPM168: Robotics Applications with ROS2: From Basics to Integration
Proffesors: Pablo Romero, Álvaro Gutiérrez Martín, Sergio López

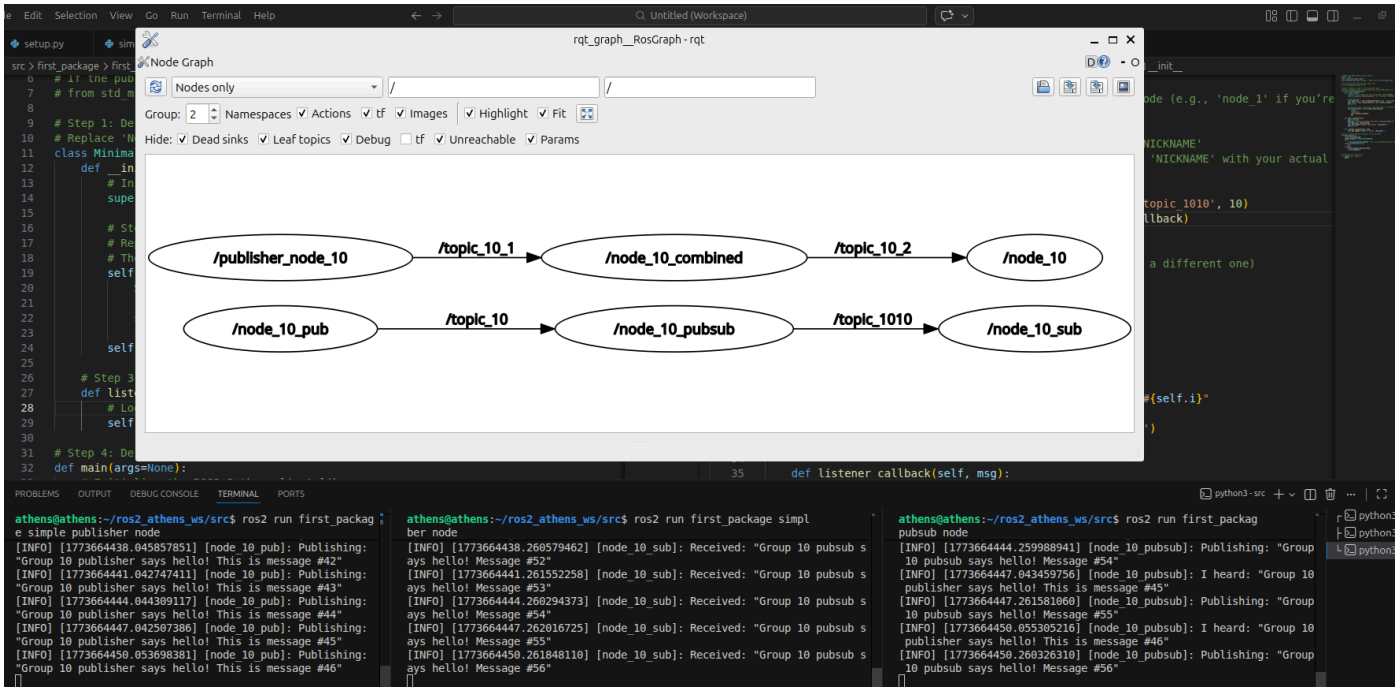
## Table of contents

- Introduction to ROS2
- Basics of ROS2
  - B.1 Publisher and Subscriber
- Deliverables
  - D.1 Adding the STM hardware to the ROS2 environment
  - D.2 Implement the STM ROS2 Control Node
  - D.3 Create Launch files
  - D.4 Visualizing the STM in RVIZ2
  - D.5 Integrating the STM serial node to control the Turtlesimin Gazebo

# Introduction to ROS2

# Basics of ROS2

## B.1 Publisher and Subscriber



as you can see, this report is very unfinished

# Deliverables

## D.1 Adding the STM hardware to the ROS2 environment

## D.2 Implement the STM ROS2 Control Node

## D.3 Create Launch files

## D.4 Visualizing the STM in RVIZ2

## D.5 Integrating the STM serial node to control the Turtlesimin Gazebo
